

Cupori 141 (Fincu)

Cupori 141 (Fincu) is a copper tube with a leak-indicative plastic coating. To make it easier to cut lengths directly from the coil, the product name and size are marked on the tube at one-metre intervals. Leak-indicative tubes from Cupori are easy to bend. The tube can be soldered or connected with capillary fittings or with press and compression fittings requiring no hot work.
